

Irish/EU Citizen with full rights to work in the UK.

PROFILE SUMMARY

Fullstack Software Engineer working at GHX on a major Healthcare Trading Platform with an enormous user base. Main tech stack is Java, Spring and Hibernate on the Backend. Previous roles in Recruitment and Teaching, as well as an education in Law and Project Management has given me excellent managerial and customer facing experience. Excellent organizer and communicator.

Interested in innovative design, development, configuration, testing, debugging and support of responsive software. Possesses a superior capacity to understand new concepts and willing to embrace new challenges, eager to learn and grow as a Software Engineer. Seeking to join a successful team of professionals where hard work and results matter, with a dedication to customer satisfaction, and the achievement of personal and corporate goals which in turn lead to increased responsibility and potential.

- Designed, built, troubleshoot, and debugged the application. Lots of debugging.
- Leveraged industry expertise, and a creative mentality to produce complex designs for diverse audiences.
- **Technologies used:** *Java, Maven, Spring MVC, Spring Boot, Postman, SQL, Git, GitHub, JSON, Security*

PROFESSIONAL WORK EXPERIENCE

Java Software Engineer

July 2023 - present

GHX UK

- Developed and maintained Java-based applications for GHX, ensuring optimal performance and reliability.
- Collaborated with cross-functional teams to design and implement scalable solutions using Java and Springboot.
- Conducted thorough testing and debugging of Java code to identify and resolve issues efficiently.
- Contributed to the enhancement of GHX's software products through innovative Java development methodologies and best practices.

Fullstack Software Engineer

Oct 2021 - July 2023

Cognizant UK

- Working with Cognizant on a major government project. Reforming and transforming the web services of one of the largest government departments. Set to have a lasting effect on the entire population of the UK, who will use it on a regular basis.
- On the backend we work mainly with Java, Hibernate, Springboot, Gradle on Microservices to make sure the functionalities of the Web Services are exact. To do this I create classes, work on the MVC structure, then test, debug, and go through TDD to make sure the CRUD calls are working properly and then I create a PR on Github and ask for a Tech Review. Always keen to learn new tech important to the team. A great team player, always positive and seeking a viable solution.

IT Recruiter

Mar 2019 - Mar 2021

APEX Systems (ASGN), Penrose Wharf, Cork City

- Successfully raised 300k Euro in sales for the company.
- Provided Managed services as Apex's HR liaison for our contractors.
- Cold calling and sourcing potential customers.
- Providing an excellent customer and client experience.

Japanese English Teacher

Jan 2017 - July 2018

JET Programme (Japanese Government Employee), Kagoshima City, Japan

- Taught English to over 1800 Secondary students regularly. Often travelled to random primary schools around the district to get children more enthusiastic about English.
- Organized class schedules and activities for 4 to 6 classes a day, working with 10+ teachers and given the full control of the class, taught through English and Japanese.
- Worked through very high stress situations such as earthquakes in the middle of classes or during threats of nuclear war (NK launching nukes over Japan in 2018).

VOLUNTEER WORK

- St. Vincent de Paul, Listowel (Biggest Charity in Ireland)

2017 - 2021

INTERESTS AND ACHIEVEMENTS

- Reading, Fitness, Literature, Adventure/travel, Self-Development, martial arts.
- Obtained the honorary title of JET Kizuna Ambassador awarded by Kagoshima Board of Education for the acclaim won from my teachers and students for enthusiasm and conscientiousness. Still have regular contact with the Embassy. • Prince2 Certified
- Can speak basic Japanese, French and Irish.
